

Certified Car and Booster Seat Checks by Nationally Certified Child Passenger Safety Technicians

What can I expect?

Certified Technicians will:

- **Inspect the child restraint** for recalls, note obvious errors, and obtain a history
- **Confirm that the child restraint** is correct for the size, weight and age of the child.
- **Provide hands-on instruction** on how to install and use the child restraint in the vehicle.
- **Offer guidance** or demonstrate how to correctly place a child in the child restraint.
- **Answer questions** parents or caregivers may have.

What can I do?

- **Provide the age and weight** for each child under 8 when making the appointment.
- **Bring the child** to the inspection station appointment using the child's current restraint.
- **Provide** the vehicle owner's manual.
- **Provide** the child restraint instructions.
- **Allow at least 20 to 30 minutes** for each seat to be checked.
- **Be prepared to purchase a replacement child restraint** if the current restraint is unsafe. Seats are replaced AT COST or donation.

Note: Inspection station personnel are not responsible for defects found in the child restraint. It is recommended that parents/drivers replace a restraint if it has been involved in a crash or was purchased from a yard sale or consignment shop.
